

it is possible and that it would work and then next year, hopefully, come back and LB 544 would then possibly be put into effect proving that the electronics and the mechanics of the whole process are functional.

SENATOR WEHRBEIN: Okay, thank you. That answers my question. How would this be demonstrated? Would this be to select a county or two to try it? Is that the idea?

SENATOR CONWAY: I believe the demonstration project would be in the Secretary of State's Office at the central point and each county already has access to that system and, therefore, could interact with it and exchange theirs. So really the demonstration project would be at the central point, then allowing each county to access it through their current systems.

SENATOR WEHRBEIN: Okay, but it would be a limited amount because they could...if it was a demonstration, everyone couldn't do it.

SENATOR CONWAY: Correct.

SENATOR WEHRBEIN: How would they restrict it?

SENATOR CONWAY: This, I don't know. They didn't share that with me in terms of how they restrict it. They simply wanted to be able to show that it's possible and that any county could access that central system and run their system that way.

SENATOR WEHRBEIN: Okay, thank you.

SPEAKER BAACK: Thank you, Senator Wehrbein. Senator Moore.

SENATOR MOORE: Once again, not to nit pick at Senator Conway's amendment, but it's one of those things that if you look at the statement of intent on the bill, there was two people that came in and opposed it, the Land Title Association and the State Bar Association. A couple other concerns, obviously, is the one is that certainly once again Senator Conway's amendment, in and of itself, does not make that big a change but when you go to a...really a computer, centralized computer filing whereas now, you know, the title company, it only has to search the county where the land is located in. If you would go take Senator Conway's amendment and continue to do that, you know, eventually that title company would not have to search just Lancaster
